Hi Chris,

No, that is not what I need. You left me a message on June 2, 2011 saying that you the license should read 500 mCi per source and 3230 millicuries total. Basically, I need the amount per source (which should be the portable gauge with the highest amount of cesium) and the maximum possession limit (MPL) (which is –at a

minimum- the sum of all the fixed gauges you possess including those in storage). The MPL can be greater than what you have in inventory.

Please confirm the message from June 2, 2011 is correct and the limits should be 500 mCi per source and 3230 millicuries total OR provide new limits per source and a new maximum possession limit.

Regarding the change in RSO, you need to submit a license amendment with the name of the individual you want to propose as RSO along with the individual's qualifications (e.g., RSO certificate from manufacturer).

Regarding the change of ownership, appendix C of the attached NUREG 1556 Volume 4 contains the information you need to submit to the NRC regarding the transfer of control.

Please address at a minimum the limit per source and the maximum possession limit by tomorrow Friday, June 17, 2011.

Thanks,
