All Rights Reserved

The design, engineering, and other information contained in this document have been prepared by or on behalf of the Westinghouse Electric Company LLC in connection with its application to the United States Nuclear Regulatory Commission (NRC) for design certification of the AP1000 passive nuclear plant design pursuant to Title 10, Code of Federal Regulations Part 52. No use of or right to copy any of this information, other than by the NRC and its contractors in support of Westinghouse's application, is authorized.

The information provided in this document is a subset of a much larger set of know-how, technology and intellectual property rights pertaining to standardized, modularized, nuclear powered, electric generating facilities that utilize a minimum of active components and are characterized by a passive shutdown system, designed by Westinghouse and referred to as the AP1000® nuclear power plant design. Without access and a Westinghouse grant of rights to that larger set of know-how, technology and intellectual property rights, this document is not practically or rightfully usable by others, except by the NRC as set forth in the previous paragraph.

This document has sensitive unclassified non-safeguards information (SUNSI) related to the physical protection of an AP1000 Nuclear Plant redacted pursuant to 10 CFR 2.390(d).
