SUBJECT: LICENSE AMENDMENT

Dear Mr. Gentleman:

Please find enclosed corrected copy for Amendment Number 03 to License Number 49-27443-01. The NRC has established that all materials licenses should have maximum possession limits listed on materials licenses as recommended by the Materials Program Working Group (MPWG) of the Office of Federal and State Materials and Environmental Management Programs (FSME). Previously, your license had an “open ended” possession limit described in Item 8 of your materials license. **The attached corrected copy contains a “closed ended” possession limit, which specifies the maximum amount of activity per source and total activity allowed for each radioisotope on the license. The amount was obtained from the recent inspection conducted at your facilities on April 19, 2010.** If you have any questions, or if the corrected copy of your license does not accurately document the amount of material that you possess, please call or email me at (817) 276-6596 or lizette.roldan@nrc.gov to amend the license, as appropriate.

In accordance with 10 CRR 2.390 of the NRC’s “Rules of Practice,” a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the NRC’s document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Thank you for your cooperation.

Sincerely,

/RA/

Lizette Roldán-Otero, Ph.D., Health Physicist
Nuclear Materials Safety Branch B
