Re: Kewaunee Nuclear Power Plant
Docket No. 50-305

Dear Mr. Vollen:

To complete informal discovery in the above-captioned proceeding, we are now enclosing all 1973 inspection reports from the Division of Regulatory Operations for the above facility as we agreed with Mr. Comey and in our letter to you of September 25, 1973. The enclosed documents are numbered consecutively KRI-1 to 156, and include inspection reports 73-01 to 73-11, 73-13, 14 and 73-16.

Two inspection reports have not yet been released because of the customary twenty day delay for proprietary review by the applicant. These are numbers 72-12 and 72-15. We shall send these and any later inspection reports to you as they become available.

A few additional documents from Regulatory Operations remain to be provided, and we expect to have these to you during the week of October 8. That will complete informal discovery and should, with documents given you earlier, provide you with all documents in the possession of the Regulatory Staff relating to the Kewaunee proceeding.

Sincerely,

151
Perry B. Seiffert
Counsel for AEC Regulatory Staff
