Subject: FW: Calvert Cliffs, Unit 3, New and Spent Fuel Storage Racks. 01/29/2010

The attached UniStar letter (ML100340621) informs NRC of UniStar's decision to use Areva Transnuclear design for the new and spent fuel racks in lieu of the current Holtec deign included as topical report UN-TR-08-001 in their application. By this letter they are informing us that:

- they will be incorporating EPR FSAR sections 9.1.1 and 9.1.2 by reference in their application, thus using the transnuclear design for fuel racks
- the staff should not pursue review of their topical report UN-TR-08-001 included in the current revision of the application
- the revised FSAR sections incorporating these changes will be submitted by 2/15/2010

Please pass on this information to the applicable technical reviewers. I will distribute the revised FSAR sections as soon as they are received.

Thanks.
