**Subject:** Turkey Point: Relocation of Cycle Specific Parameters to the Core Operating Limits Report (COLR) - Reactor Systems (SRXB) Request for Additional Information

Steve,

Below is a request for additional information (RAIs) regarding the Turkey Point "Relocation of Cycle Specific Parameters to the Core Operating Limits Report (COLR)" license amendment request. On June 21, 2011, you stated that a call is not needed to discuss the draft RAI sent to you via email. The below RAI reflects the question that was sent to you and agreed upon by Florida Power & Light Company (FPL). FPL agreed upon providing its responses within 30 days of the date of this email. If you have any questions, feel free to contact me.

1. WCAP-8745-A states, "In this report responding to the NRC request, the protection systems and methods for set point determination apply to all Westinghouse plants which reference RESAR-3S, and which are operating under the guidelines of constant axial offset control without part-length control rods (Mode A operation)." Confirm the applicability of WCAP-8745-A to Turkey Point.

**Jason Paige**, Turkey Point Project Manager  
Plant Licensing Branch II-2  
Division of Operating Reactor Licensing  
Office of Nuclear Reactor Regulation
