Office of Nuclear Reactor Regulation  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Gentlemen:

Docket 50-305  
Operating License DPR-43  
Kewaunee Nuclear Power Plant  
Proposed Amendment No. 42

Enclosed please find 40 copies of Proposed Amendment No. 42 to the Kewaunee Plant Technical Specifications. This proposed amendment revised the technical specifications to reflect the reorganization of the Nuclear Department which became effective March 1, 1980. The following are the affected pages:

- TS 6-1
- TS 6-3
- TS 6-4
- TS 6-5
- TS 6-6
- TS 6-7
- TS 6-10
- TS 6-12
- TS 6-26 (Figure TS 6.2-1)
- TS 6-26 (Figure TS 6.2-2)

In addition to the title changes incorporated by this revision, the technical specifications are also revised to clarify the responsibilities of the Plant Operation's Review Committee (PORC), the Nuclear Safety Review and Audit Committee (NSRAC), the Corporate Nuclear Engineering Staff (CNES), and the Quality Assurance Group. Additionally, Specification 6.5.3.8 was revised to replace the word "all" with "the" in the phrase "conformance to the provisions contained within the technical specifications." This is more consistent with the intent of the specification since an audit does not generally apply to all of the provisions in the technical specification. Finally, Specification 6.5.3.8.f was revised to remove the word "annual" which was used in reference to the independent fire protection and loss prevention program. This wording is consistent with our actual requirements.
