Dear Mr. Licciardo:

The NRC has issued Amendment No. 35 to the Kewaunee Nuclear Power Plant Technical Specifications and Operating License. This amendment removes the limitations on the temperature changes across the condenser and the maximum temperature of the discharged condenser cooling water, and the related monitoring requirements. In addition, Proposed Amendment No. 46 has been submitted to the NRC for review.

The attached revisions incorporate these changes into the Technical Specifications and update the Revision Control and Current Status pages of your manual. Please follow the enclosed instruction sheet when revising your manual. If you have any questions regarding the revisions, please contact Mr. John G. Thorgersen of our Corporate Nuclear Engineering Staff at (414) 433-1303.

Sincerely,

A handwritten signature in cursive script that reads "Charlie Schrock".
