Mr. D. G. Eisenhower, Director
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Gentlemen:

Docket 50-305
Operating License DPR-43
Kewaunee Nuclear Power Plant
Proposed Amendment 47 to the KNPP Technical Specifications

Reference: Letter from E. R. Mathews (WPSC) to D. G. Eisenhower (NRC)
dated October 13, 1981, transmitting Proposed Amendment 47

On October 13, 1981, we transmitted a preliminary copy of Proposed Amendment 47 to the KNPP Technical Specifications and noted that a formal application for amendment would be made on this date. This letter comprises that application and includes three signed originals of this letter and forty copies of the proposed technical specifications.

The proposed changes to the technical specifications incorporate the Category "A" items of the Lessons Learned from the accident at Three Mile Island into the Kewaunee Technical Specifications. Our letter of October 13, 1981, discussed the specific changes being proposed and serves as our safety evaluation. These changes were originally requested by the NRC staff in your letter of July 2, 1980.

Based on our review of these changes, we have concluded that they involve a single safety issue, and their acceptability has been clearly identified by the NRC in your letter of July 2, 1980. Therefore, in accordance with
