Mr. D. G. Eisenhut, Director
Division of Licensing
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission

Gentlemen:

Docket 50-305
Operating License DPR-43
Kewaunee Nuclear Power Plant
Proposed Amendment 49 to the KNPP Technical Specifications

Proposed Amendment 49 is being submitted to clarify the intent of KNPP's Technical Specifications (TS). These revisions include the rearrangement of the Table of Contents, correction of typographical errors, and several other administrative changes.

Enclosed please find three signed originals of this letter and forty copies of the pages affected by this revision as required by 10 CFR 50.90. In accordance with 10 CFR 170.22, please find enclosed a check for \$1,200. It has been determined that this submittal is a Class II Proposed Amendment as the changes are administrative in nature.

820 8240 250 P

A001
\$ 1,200

The pages and specifications affected by Proposed Amendment 49 are as follows:

Page TS i, Table of Contents; Appendix A

A reorganization of the Table of Contents, Appendix A, resulted in part of the text of Page TS i to be shifted to Page TS ii. Specification numbers, titles, and page numbers of existing specifications were added under Section 3.1.

Page TS ii, Table of Contents; Appendix A

A reorganization of the Table of Contents, Appendix A, resulted in shifting the text of Page TS ii to Pages TS ii, TS iii, and TS iv. Specification titles were included for Specifications 3.10.k, 3.10.l, and 3.10.m. Existing specification numbers, titles, and page numbers were included under Sections 3.15, 4.2, and 4.15.

Page TS iii, Table of Contents; Appendix A

A reorganization of the Table of Contents, Appendix A, resulted in shifting the text of Page TS iii to Pages TS iv and TS v. Two spelling errors were corrected. Existing specification numbers, titles, and page numbers were added under Sections 6.9.1 and 6.9.2. The title of Section 6.11 was changed to make it consistent with Page TS 6.24. The title to Specification 6.12 was included to retain consistency with Page TS 6-24.a.

Page TS iv, List of Tables; Appendix A

A reorganization of the Table of Contents, Appendix A, resulted in shifting the text of Page TS iv to Page TS vi. Existing Tables 3.1-2 and 3.5-5 were included to be consistent with KNPP TS Section 3 Tables.

Page TS v, List of Figures, Appendix A

A reorganization of the Table of Contents, Appendix A, resulted in shifting the text of Page TS v to TS vii. Two spelling errors were corrected. The titles of Figures 3.1-4, 3.10-3, 3.10-4, 3.10-5, 3.10-6, and 3.10-7 have been changed to retain consistency with KNPP TS Section 3 Figures.

Page TS 3.3-2, Specification 3.3.a.1.G

This revision clarifies the conditions under which the reactor can be made critical with regards to automatic valves, instrumentation, piping, and interlocks associated with safety injection and residual heat removal systems. The words "are operable" have been added at the end of this specification.

Page TS 3.5-6, Basis Instrument Operating Conditions

Amendment No. 42 which was issued by the Commission on April 30, 1982, accidentally deleted a paragraph that was included under Amendment No. 38 which was issued by the Commission on November 6, 1981. The text of Page TS 3.5-5 has been revised to include the deleted paragraph. A typographical error has also been corrected.

Page TS 3.9-6 Specification 3.9.b.4.a

The wording has been changed to clarify which monitors and samplers shall be operable during the release of gaseous wastes.

Page TS 3.9-7 Specification 3.9.b.4.c

The redundancy has been removed from this specification clarifying its intent while maintaining consistency with its basis.

Page TS 3.10-21, Reference 8

A date has been added to the correspondence from Exxon Nuclear Company to WPSC.

Table TS 3.5-1, (Page 1 of 2), Section 3 Tables

The revision to the setting limit for functional unit No. 5 specifies the desirable range of operation. A typographical error was corrected under functional unit No. 8.

Page TS 6-17, Specification 6.9.2.a.5

The value of "one percent" concerning reactivity anomalies involving disagreement with the predicted value of a reactivity balance under steady state conditions has been changed to " $1\% \Delta K/K$ " for clarity.

A typographical error was corrected.

Page TS 6-24, Specification 6.9.2.d

A typographical error was corrected.

Page ES i, Table of Contents; Appendix B

Sections 2.0, 3.0, and 4.0 which were removed by Amendments 43 and 35 have been included in the Table of Contents to show what was deleted. Existing specification numbers, titles, and page numbers were added under Sections 5.1, 5.4, and 5.5. The text of Page ES i was reorganized for ease in reading.

Environmental Technical Specifications

It is requested that the remaining Environmental Technical Specifications be removed from the KNPP Technical Specifications and Operating License. The definitions in Section ES 1.0 no longer apply. Sections 5.1, 5.2, and 5.3 no longer apply because there are no limits on Environmental Specifications as the Environmental Specifications were previously deleted. Section 5.4.1, Annual Environmental Operating Report, is covered under Technical Specification 6.9.3 for radiological releases. Non-radiological

releases are reported monthly to the Wisconsin Department of Natural Resources. Sections 5.4.b and 5.4.c are not applicable because the specifications requiring reporting have been deleted. Section 5.4.d, written reports concerning changes to the plant or plant procedures, is covered under 10CFR50.59. Section 5.4.e is no longer applicable because the NRC monitoring programs have been eliminated. All plant documents covered by Section 5.5 are kept on file either permanently or for six years by other sections in KNPP Technical Specifications.

In addition to the above Proposed Amendment several pages affected by previous amendments were issued by the NRC without change bars, or with other minor administrative errors. This submittal requests the pertinent change bars be included along with their respective amendment number, and the other errors also be corrected. The affected pages and the other changes made for historical reasons are explained below.

<u>KNPP T.S. Page Number</u>	<u>WPS Proposed Amendment Number</u>	<u>Date Amendment Received from Commission</u>	<u>NRC Amendment Number</u>	<u>Specification</u>
Table TS 3.15-1	40	4/21/82	39	NA
Table TS 3.15-2	40	4/21/82	39	NA
TS 3.10-2	48	4/29/82	41	3.10.b.1.A.iii
TS 3.10-6	48	4/29/82	41	3.10.e.2
TS 3.10-8	48	4/29/82	41	Basis Shutdown

- (1) Amendment No. 39 issued by the Commission (4/21/82) revised TS 4.15.b.5. Amendment 39 also indicated that 4.15.b.4.C was changed; however, specification 4.15.b.4.c was revised by NRC Amendment No. 25.
- (2) Amendment 17 (1/1/78) issued by the Commission approved the revisions of Pages TS 3.1-3 through 3.1-8. This revision shifted the text of page TS 3.1-8 to page TS 3.1-7. Amendment 40 (4/21/82) issued by the NRC called for the removal of page TS 3.1-8 which did not exist. It is requested that a

Mr. D. G. Eisenhower

- 6 -

blank page numbered TS 3.1-8 be included in the KNPP TS for historical purposes.

- (3) Table TS 4.10-1 page (1 of 6) and page (5 of 6) have been revised to maintain consistency with the method for footnoting revisions to KNPP TS.
- (4) Amendment No. 45 (6/2/82) made the requested revision of specification 3.1.a.6 in regards to "Pressurizer Heaters", however the change bar was included with specification 3.1.a.5 instead of specification 3.1.a.6. The change bar has been moved to specification 3.1.a.6 for historical purposes.

The pages affected by the above requests are enclosed.

Very truly yours,

C. W. Giesler
Vice President - Nuclear Power
