Director of Nuclear Reactor Regulation
Attention: Mr. S. A. Varga, Chief
Operating Reactors Branch No. 1
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Gentlemen:

Docket 50-305
Operating License DPR-43
Kewaunee Nuclear Power Plant
Technical Specification Regarding Lower Limits of Detection

- References: 1) Letter from C. J. Paperiello (NRC) to C. W. Giesler (WPSC) dated March 8, 1984, transmitting Inspection Report 50-305/84-01.
2) Letter from D. C. Hintz (WPSC) to S. A. Varga (NRC) dated August 21, 1984

Inspection Report 84-01 noted our commitment to review the approximate Minimum Detectable Activity (MDA) specifications of Table 4.10-1 of the Kewaunee Nuclear Power Plant Technical Specifications and propose revised specifications, if needed (open item 83-03-01). This was to have been completed by August 1, 1984. Our review of these specifications is complete; however, as we have discussed with Ms. Nora Nicholson of NRC-Region III, we intend to submit the related technical specification revisions as part of the Radiological Effluent Technical Specifications (RETS) approximately March 1, 1985. Since the RETS work includes Table 4.10-1 (and much more), combining these items will eliminate some redundant work.

Very truly yours,

DCH
D. C. Hintz
Manager - Nuclear Power
