Dr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Gentlemen:

Docket 50-305
Operating License DPR-43
Kewaunee Nuclear Power Plant
TAC #56410
Proposed Amendment 59A to the KNPP Technical Specifications

- References: 1) Letter from C. W. Giesler to H. R. Denton dated
March 30, 1984
- 2) Letter from M. B. Fairtile to D. C. Hintz dated
January 9, 1985

In reference 1 we submitted Proposed Amendment No. 59 to the Kewaunee Nuclear Power Plant (KNPP) Technical Specifications. The NRC Safety Evaluation (Reference 2) concluded that our proposed amendment was acceptable and Amendment 59 to the Kewaunee Nuclear Power Plant Technical Specifications was issued on January 9, 1985.

Proposed Amendment 59 (Reference 1) included proposed technical specifications on the Control Room Ventilation System. We have been informed by our NRR Project Manager that the Control Room Ventilation technical specifications are being reviewed separately by NRC Region III under TAC# 56410 and therefore were not included in approved Amendment 59.

Subsequent review by NRC Region III has identified an unnecessary redundancy in the existing specifications that could cause confusion. Therefore, we hereby submit three signed and notarized originals and forty (40) copies of Proposed Amendment 59A as a supplement to the original amendment submitted with Reference 1.

Page 2

A description of the specific technical specifications change with the appropriate significant hazards determination and a copy of the affected pages are included as an attachment to this letter. The affected pages are Table TS 4.1-3, pages 1 of 2 and 2 of 2.

In accordance with the provisions of 10 CFR 50.91(b)(1), a copy of this submittal has been transmitted to the Public Service Commission of Wisconsin.

Since this submittal is part of an on-going review (TAC# 56410) no application fee is required.

Very truly yours,

Carl W. Giesler
Vice President - Power Production
