Gentlemen:

Docket 50-305
Operating License DPR-43
Kewaunee Nuclear Power Plant
Documents Requested Prior to Equipment Qualification Inspection

Reference: 1) Letter from C. J. Paperiello (NRC) to D. C. Hintz (WPSC)
dated January 30, 1987

As requested by reference one and by telephone conversations with Mr. A. S. Gautam of NRC Region III on January 28, 1987 and February 11, 1987, the following information is being submitted to facilitate NRC preparation for the equipment qualification (EQ) inspection for the Kewaunee Nuclear Power Plant (KNPP):

Attachment A - Updated Master Equipment List

Attachment B - Major Administrative Procedures Addressing Implementation of the EQ Program

Attachment C - WPSC Submittals Relevant to the Final NRC EQ SER

Attachment D - Latest QA Audit Report on EQ Activities

Attachment E - KNPP Environmental Qualification Plan

The WPSC submittals in Attachment C include two letters specifically requested by Mr. A. S. Gautam. The April 22, 1983 submittal includes the master equipment list as it existed at that time. The January 31, 1985 submittal contains WPSC's response to Generic Letter No. 84-24, "Certification of Compliance to 10 CFR 50.49, Environmental Qualification of Electric Equipment Important-to-Safety for Nuclear Power Plants."

Mr. Gautam also requested that, if available, the system component evaluation worksheets (SCEWs) for master equipment list items should also be included in this letter. Currently, WPSC is in the process of converting from the existing SCEW batch computer system to a new on-line computer system. Unfortunately, the existing SCEW system does not have the capability of printing the specific information requested by Mr. Gautam. While the new system does have this capability, the data entered in this system has not yet been properly reviewed and verified. However, the new on-line computer system will have a properly reviewed data base prior to the NRC EQ audit of March 9-13, 1987. Therefore, the specific information requested will be available at that time. The detailed information provided by the updated master equipment list (Attachment A) should adequately fulfill your pre-audit needs. Should you discover that you require any additional information, please feel free to contact my staff.

In accordance with 10 CFR 50.4, this letter is addressed to the NRC Document Control Desk. However, the attachments are only included in the copy sent to NRC Region III.

Sincerely,

A handwritten signature in cursive script that reads "Dan Ropson" followed by a forward slash and the word "for".

D. C. Hintz
Vice President - Nuclear Power
