Gentlemen:

Docket 50-305
Operating License DPR-43
Kewaunee Nuclear Power Plant
Emergency Plan Revision 8

A modification has been made to the Kewaunee Nuclear Power Plant (KNPP) Emergency Plan. A description of the change and the safety evaluation are included as Attachment 1 to this letter. A copy of the revised pages are included as Attachment 2 to this letter. This change does not decrease the effectiveness of the plan and continues to meet the standards of 10 CFR 50.47(b) and the requirements of Part 50, Appendix E; therefore, it is made in accordance with 10 CFR 50.54(q) and prior Nuclear Regulatory Commission approval is not required.

Pursuant to 10 CFR 50.4, two additional copies of this letter and attachments are hereby submitted to Mr. A. Bert Davis, Regional Administrator, U. S. Nuclear Regulatory Commission, Region III, Glen Ellyn, Illinois. As required, one copy of this letter and attachments is also submitted to the KNPP Resident Inspector.

Please remove and discard the affected pages and insert the revised pages as instructed on the "KNPP Emergency Plan Revision Instruction Sheet" (Attachment 2). Please sign and return the revision certification block on the last page of the revision instruction sheet to assure us that you have received your copy.

Sincerely,

D. C. Hintz
Vice President - Nuclear Power

DESCRIPTION OF CHANGE AND SAFETY EVALUATION

A845
4/1

Record of Revisions

Description of Change

Added revision 8 to the table of revisions to reflect the change made in this revision to the plan.

Safety Evaluation

Since the change is administrative in nature, it does not decrease the effectiveness of the plan.

Page 5-8

Description of Change

Revised the requirements of the Event Operations Director. The plan has been changed to read as follows: "Event Operations Director must hold a SRO license or be a member of senior management who is an engineer trained in nuclear operations."

Safety Evaluation

This revision will allow a Senior Reactor Operator (SRO) licensee who is not actively performing the functions of a senior operator as described in 10 CFR 55.53(e) to hold the position of Event Operations Director (EOD). There is a possibility that candidates for the EOD position may be non-

engineers who have a non-active SRO license, and it is for this small group of individuals that the revision was made. These individuals would be employees with many years of operational experience who are well qualified for the EOD position. The EOD's responsibilities include interfacing with the Shift Supervisor to determine the most appropriate course of action. It is not expected that the EOD will need to relieve the Shift Supervisor. Should relief of the Shift Supervisor be necessary, qualified personnel (i.e., active SRO) will be contacted. Therefore, this change does not decrease the effectiveness of the plan.
