Documents Title in ADAMS)

09:45 I spoke with the receptionist who indicated that the renewal application had been faxed in earlier in the week. I informed her that I would look around for the application and if I could not find it, I would call back.

11:15 Mr. Price called back to inform me that the renewal application had not been sent in. The gauge in West Virginia had been brought back to the Virginia office and the licensee intends to terminate its license. I informed Mr. Price that the NRC still requires a request in writing to terminate the license and directed him to the NRC website for the proper documents. Mr. Price assured me that the documentation would be provided to the NRC prior to June 30th. I went over the procedures for reciprocity in case the company decides that they have work to perform under NRC jurisdiction.**Action Required: Stand-alone document to be placed in ADAMS.****Document Availability:**☒
