**Subject:** Request for Information Regarding WRAMC - Forest Glen Annex Radiological Materials Usage

My name is Mike Barsa and I'm with Cabrera Services. We're currently working for USACE on an historical site assessment to support BRAC activities at the Forest Glen Annex of Walter Reed Army Medical Center in Silver Spring, MD, and I was directed to look into the possibility that the Army Environmental Command may have information, inventories, documentation, etc. regarding any radiological materials usage at any of the buildings there. Given the timeframe of this study, it is possible that we'll be looking at older USATHEMA records. I have already extensively searched records at both Walter Reed Army Medical Center itself and the Army Reactor Office (regarding the Diamond Ordnance Radiation Facility, DORF, formerly held at Building 516), but I figured I should at least check to see if there is anything you may have that I may not have seen already.

Thanks,

**MICHAEL W. BARSA**
