Absolutely, a DPW-type of question. NAD RIT doesn't have any more info than NAB might be able to provide.

Does the NAD RIT have any information regarding a WRAMC - Forest Glen Annex Radiological Materials Usage? Is this a Baltimore contract?
Shouldn't the WRAMC DPW Environmental Office have this kind of information?

Sir
Our Pentagon Army Staff mostly deals with the war fighter.
I have sent your email on with the intent to get information from the US Army Corps of Engineers. I will let you know if we are successful.
Thanks,
Bill

Subject: Request for Information Regarding WRAMC - Forest Glen Annex Radiological Materials Usage

My name is Mike Barsa and I'm with Cabrera Services. We're currently working for USACE on an historical site assessment to support BRAC activities at the Forest Glen Annex of Walter Reed Army Medical Center in Silver Spring, MD, and I was directed to look into the possibility that the Army Chief of Engineers Office may have information, inventories, documentation, etc.

regarding any radiological materials usage at any of the buildings there. I have already extensively searched records at both Walter Reed Army Medical Center itself and the Army Reactor Office (regarding the Diamond Ordnance Radiation Facility, DORF, formerly held at Building 516), but I figured I should at least check to see if there is anything you may have that I may not have seen already.

Thanks,

MICHAEL W. BARSA
