Classification: UNCLASSIFIED  
Caveats: NONE

Mr. Barsa,

I have seen no records or have any knowledge of any on site burial of radioactive waste. As far as I know all radioactive waste was held for decay, discharged to the sanitary sewer or shipped off site for burial.

Subject: Question Regarding Possible On-site Burials at Forest Glen

Hi Mr. Burton,

In the progress meeting for the Forest Glen HSA, it was suggested to us that we need to confirm or deny that there were any on-site rad disposals/burials at Forest Glen. It was brought up to us that the current softball fields were built where a landfill used to be, and even though the question is purely anecdotal, we were asked as to whether any rad waste may have gone there (or to any other on-site burial area), either knowingly or unknowingly. I know the ball fields were put up in 1971, so I don't even know how much (if any) rad usage would have been occurring prior to that, but I figured you may be able to shed some light on the question for us.

Thanks!

-Mike
