

Panelist

Pat Zanzonico, PhD

- **Attending Physicist
Chairman, Committee on Radiation
Co-Head, Small-Animal Imaging Core Facility
and Nuclear Medicine Research Laboratory
Memorial Sloan-Kettering Cancer Center**
- **Member, Advisory Committee on Medical
Uses of Isotopes, NRC**
- **Past Member, National Council on Radiation
Protection and Measurement (NCRP)**
- **Member, Medical Internal Radionuclide
Dosimetry (MIRD) Committee**

Questions for Discussion

Should the NRC eliminate the attestation requirement for individuals seeking authorized status via the board certification pathway?

- For recognized boards?**
- Regardless of date of NRC recognition of board?**
- For grandfathered individuals?**

Yes, appropriate adjudicator of professional competency is one's peers, *ie* specialty boards, regardless of date of board recognition. Certification *or* having been listed on license affirms that all requirements have already been satisfied.

Questions for Discussion

For the alternate pathway, should attestation requirement be retained?

Attestation by whom?

Language of attestation?

Yes, with attestation by authorized individual or residency program director - of training/experience but *not* of competency
