Subject: Comment in support of PRM-50-96 NRC-2011-0069

OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

Dear Secretary,

I am writing in support of PRM 50-96 (NRC-2011-0069) submitted by Thomas Popik and the Foundation for Resilient Societies.

This petition for rulemaking seems to me to be exactly what is needed.

PRM 50-96 would require utilities to install reliable and renewable backup power systems, for a period of up to two years, to ensure cooling of irradiated fuel pools in the event of an extended loss of offsite power.

As is only now well known and recognized, the Fukushima catastrophe demonstrated clearly the consequences of a loss of offsite power to nuclear reactors and/or their nuclear fuel pools.

Well, it's obvious to me, that the NRC must take immediate and relevant action to address this issue.

The typical nuclear facility includes battery backup power that would last 4-8 hours, plus emergency diesel generators. While these generators were inoperable at Fukushima, and the accidents there took place in a relatively short amount of time, these generators are not designed to operate for extended periods of time.

PRM 50-96 was drawn up due to concern over large-scale solar flares that could cause long power outages in the U.S. As the Washington Post reported on June 21, 2011, a 2008 National Academy of Sciences study warned that a major solar storm "could knock out power in parts of the northeastern and northwestern United States for months, even years."

No U.S. nuclear reactor or fuel pool could withstand such a lengthy loss of power. Immense radiation releases would be certain.

Given the events at Fukushima, it appears nuclear facilities are not able to withstand power outages for even a fraction of that time. Thus, there is considerable urgency to improving back-up power systems.

I write to urge the NRC to quickly approve PRM 50-96 and to amend this petition to include suitable back-up power supplies for all nuclear reactors and fuel cycle facilities as well as the irradiated fuel pools.

Thank you,

Jim Wagner
