Subject: Comment in support of PRM-50-96 NRC-2011-0069

June 27, 2011 (9:44am)

OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

Dear Secretary,

I am writing in support of PRM 50-96 (NRC-2011-0069) submitted by Thomas Popik and the Foundation for Resilient Societies.

This very prescient petition for rulemaking would require utilities to install reliable and renewable backup power systems, for a period of up to two years, to ensure cooling of irradiated fuel pools in the event of an extended loss of offsite power.

I would also like to see all the spent fuel pools not currently under the most rigorous containment updated with such containment measures as can be accomplished. In addition, spent fuel rods should be placed in dry cask storage as quickly as possible.

Thanks for your time and your work.

Solar IS Civil Defense,
George Mokray
