Subject: License amendment request

Licensee: Cabell Huntington Hospital
License Number: 47-00404-02
Docket Number: 03003320
Mail Control No: 575259

<Please reply to this email to confirm receipt>

Dear Mr. Norweck,

As per our phone conversation on June 22, 2011, additional information is needed to process the amendment request for Cabel Huntington Hospital. Please see below:

- Please specify if you wish to request approval for Dr. Andrew Freeman for oral administration of NaI requiring a written directive in quantities ≤ 33 mCi as he will meet the requirements for this authorization when you submit the additional information required below for the authorizations requested.
- Did Andrew Freeman's course of study include "Chemistry of byproduct material for medical use?" Please specify the clock hours that were spent on this topic in section 3a of the NRC Form 313A AUT.
- Sm153 falls into the third category under 3.c. – supervised clinical case experience since it is a beta emitter. Please describe any radionuclides used that into the fourth category (e.g., alpha emitter or photon emitter only with photon energy > 150 keV).
- 10 CFR Part 35.690 specifies 200 hours of classroom and laboratory training are required in addition to the 3 years of supervised clinical experience in radiation therapy. However: the 313A AUS form submitted for Andrew Freeman only outlined a total of three years of training/experience. Please submit documentation for an additional 200 hours above the three years already referenced.

Once we receive the additional information requested, we should be able to finalize the processing of your license amendment. You may respond to my attention in writing by letter or fax (610-337-5269), referencing mail control 575259. If we do not receive a reply from you within 30 calendar days from the date of this e-mail, we will assume that you do not wish to pursue your amendment.

Regards,
