Attention Mr. A. Schwencer, Chief
Operating Reactors Branch #1

Gentlemen:

Docket 50-305
Operating License DPR-43

In your letter of September 13, 1978, you requested that we identify our schedule for submittal of the revised ECCS analysis with corrected zirconium-water reaction heat generation calculations. We have just received a proposal for the revised analysis from Westinghouse. Assuming that Westinghouse will be able to perform the calculations within the time frame identified in the proposal, we would not expect to receive the results of that analysis until late December of this year. As a result of our need to prepare the submittal of the analysis and associated proposed license amendments if appropriate, the earliest submittal date for the corrected analysis would be the end of January 1979. Should delays be encountered in this process, we will inform your office.

Very truly yours,

A handwritten signature in cursive script, appearing to read "E. W. James".

E. W. James
