Mr. Jack Roe, Director
Division of Licensee Performance
and Quality Evaluation
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Roe:

Docket 50-305
Docket 55-31085
Operating License DPR-43
Kewaunee Nuclear Power Plant
Appeal of NRC Administered
Requalification Exam Results

- References: 1) Letter from Geoffrey Wright, US NRC, to Mark Lorgner, WPSC, dated September 24, 1990
2) Letter from K. H. Evers, WPSC, to T. Burdick, NRC, dated August 27, 1990

On August 21, 1990, an NRC administered requalification test was given to Mr. Mark Lorgner. He was notified by Mr. Geoffrey Wright's letter of September 24, 1990 that his score on the simulator exam was not acceptable.

WPSC's understanding of the basis for this failure is that Mr. Lorgner failed to properly perform an emergency boration. WPSC believes that this was an incorrect determination. We believe that for the existing conditions of the plant, an emergency boration was not required nor intended. Furthermore, we feel that Mr. Lorgner's actions were appropriate. The basis for our position was submitted in reference 2.

WPSC is aware of Mr. Lorgner's appeal of his exam results and is in concurrence with him. Providing additional details would be redundant to his appeal; therefore, we have refrained from repeating them. However, we welcome your questions, should you have any, on this matter.
