Subject: Exelon Generation Company, LLC (EGC) Response to NRC Regulatory Issue Summary 2011-04, "Preparation and Scheduling of Operator Licensing Examinations"

Reference: NRC Regulatory Issue Summary 2011-04, "Preparation and Scheduling of Operator Licensing Examinations," dated May 26, 2011

The referenced Regulatory Issue Summary (RIS) requested that facility licensees provide a proposed schedule of operator licensing examinations and an estimate of the number of candidates requiring initial operator license examinations for calendar years 2013 through 2016, and the number of candidates requiring Generic Fundamentals Examinations for calendar years 2013 and 2014. Attachments 1 through 11 provide responses to RIS 2011-04 for the EGC plants identified above. The requested information for each facility is provided on a separate NRC Form 536.

In calendar year 2013, six candidates are expected to take the dual-site Limited Senior Reactor Operator (LSRO) initial license examination as indicated on Attachment 7. The schedule for the indicated examination is as follows: the written examination and a portion of the operating examination will be given at Limerick Generating Station (LGS); the remainder of the operating examination will be completed at Peach Bottom Atomic Power Station (PBAPS). Since the LSRO examination is a dual-site examination that involves LGS and PBAPS, rather than repeating the same information on both attachments, the examination scheduling information is provided on Attachment 7 for LGS. Attachment 9 for PBAPS references Attachment 7 where appropriate.

There are no regulatory commitments contained within this letter. Should you have any questions about this letter, please contact Mitchel Mathews at (630) 657-2819.

Respectfully,

A handwritten signature in black ink, appearing to read "Jeffrey L. Hansen". The signature is fluid and cursive, with a large loop at the end.

Jeffrey L. Hansen  
Manager, Licensing
