Regarding Amendment of 10 CFR Part 50
DOMESTIC LICENSING OF PRODUCTION AND UTILIZATION FACILITIES

Dear NRC,

I write in support of this petition Docket NO PMR-50-96.

I write as a concerned citizen.

The petitioner is correct. NRC must provide better regulations for loss or power to spent fuel pools in all nuclear reactors in the US. The petitioner has provided moderately cost worthy alternatives that would allow for the prevention of fatalities and radiation dispersement throughout the entire country.

The situation at Fukushima, Japan and that of Fort Calhoun, NE USA demand new actions by the NRC.

I urge the NRC to accept this petition amendment and act on it as quickly as possible.

Thank you,

Nancy Allen
