I will give you the revised uncertainty analysis plan (as of October), and the list of issues that need to be addressed, for the project notebook.

Thanks,  
Tina

Tina  
Thanks for letting me know. I can't get in the calendar yet but still working on it. I need a short write up on where we are with the uncertainty analysis. Often J and K say that should be your focus and that parameters etc can be picked now while the writing needs to wait until after App A. Did you send me anything in writing or were we simply planning to discuss this at a meeting when J is attending?  
Pat
