Ladies/Gentlemen:

Docket 50-305
Operating License DPR-43
Kewaunee Nuclear Power Plant
Cycle 21 Reload Safety Evaluation

This letter transmits 3 copies of the Reload Safety Evaluation for the Kewaunee Cycle 21 reload core. Our evaluation has shown that the Cycle 21 core design is more conservative than the design used in our accident analysis. Therefore, the Cycle 21 reload design does not create an unreviewed safety question, and we are proceeding with the reload in accordance with the provisions of 10 CFR 50.59(a)(1).

For your information, the Cycle 20-21 refueling outage is presently scheduled to begin April 1, 1995; and the Cycle 21 startup testing is scheduled to begin approximately May 5, 1995.

Sincerely,

C. A. Schrock
Manager - Nuclear Engineering
