Ladies/Gentlemen:

Docket 50-305
Operating License DPR-43
Kewaunee Nuclear Power Plant
SALP 10 Report

Reference: Letter from John B Martin (NRC) to C.R. Steinhardt (WPCS) dated
September 15, 1993 (SALP 10 Report)

On October 28, 1993, representatives from the NRC met with the senior managers for the Kewaunee Nuclear Power Plant (KNPP) to discuss the referenced SALP 10 report.

Although Wisconsin Public Service Corporation (WPSC) has no additional comments on the content of the report beyond those supplied at the meeting, we would like to take this opportunity to comment on the structure of the meeting itself. We found the new format to provide an opportunity for a more meaningful exchange of information. In particular, the new format provided WPSC with an enhanced opportunity to voice our comments, questions, and concerns about the SALP report. We especially appreciated the attitude of the NRC staff as they actively sought our comments and provided frank and honest responses. The staff was very receptive to our comments on the report and the SALP process. Although not always in agreement, they listened objectively and in some cases agreed further actions on their part may be necessary.

In conclusion, we realize that this is a new process and therefore the NRC and Licensees are in a learning stage. However, we are encouraged by the openness and frankness with which the issues were discussed.

Sincerely,

Clark R Steinhardt
Senior Vice President - Nuclear Power
