January 4, 1993

U. S. Nuclear Regulatory Commission
ATTN: Document Control Desk
Washington, D.C. 20555

Gentlemen:

Docket 50-305
Operating License DPR-43
Kewaunee Nuclear Power Plant
Notification of Completion of Emergency Telecommunications Activities

Generic Letter (GL) 91-14 "Emergency Telecommunications" dated September 23, 1991, informed licensees of NRC activities required to upgrade the emergency telecommunications system.

Although the GL did not require a formal response, Wisconsin Public Service Corporation is pleased to inform you that all activities necessary for the installation and testing of the Federal Telecommunications System (FTS) 2000 at the Kewaunee Nuclear Power Plant and at the Emergency Operation Facility in Green Bay were completed in August of 1992.

Based on successful testing of the FTS, the previous communications system, the Emergency Notification System, has been removed from service.

Sincerely,

C. A. Schrock
