Gentlemen:

Docket 50-305
Operating License DPR-43
Kewaunee Nuclear Power Plant
Generic Letter 92-08

- References:
1. Letter from Charles E. Rossi (NRC) to all Licensees, dated June 24, 1992 (NRC Bulletin No. 92-01)
 2. Letter from C. R. Steinhardt (WPSC) to Document Control Desk (NRC) dated July 27, 1992
 3. Letter from James G. Partlow (NRC) to all Licensees dated December 17, 1992 (Generic Letter 92-08)

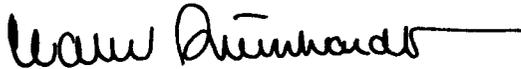

In reference 1 the Nuclear Regulatory Commission (NRC) notified Licensees of deficiencies associated with Thermo-Lag 330 fire barriers. In response, Wisconsin Public Service Corporation (WPSC) personnel reviewed purchase order records, the work requests that installed radiant heat shields, and interviewed cognizant personnel to determine if Thermo-Lag material had been installed at the Kewaunee Plant. Our investigation determined that Thermo-Lag material has not been installed at the plant and we informed the NRC of this in reference 2. In reference 3, the NRC asked Licensees who had installed Thermo-Lag material to take additional compensatory actions and provide additional information. Since Thermo-Lag material is not installed at the Kewaunee Plant, further action as described in reference 3 is not required. However, WPSC continues to follow this issue for developments that could affect us.
