Ladies/Gentlemen:

Docket 50-305
Operating License DPR-43
Kewaunee Nuclear Power Plant
Inservice Inspection Program For The Third Inspection Interval

As required by 10CFR50.55a(g)(5)(i), Wisconsin Public Service Corporation has updated the Inservice Inspection (ISI) Plan. The next 120-month inspection interval starts June 16, 1994; therefore, in accordance with 10CFR50.55a(g)4(ii) we have updated the plan to address the requirements of the 1989 edition of the ASME Code (Section XI). Where code requirements are determined to be impractical, relief requests have been generated and are included in the plan. The plan also identifies certain ASME Code Cases selected for use during the next 120-month interval; these ASME Code Cases have been determined suitable for use by the Commission staff as referenced in NRC Regulatory Guide 1.147, Revision 10, "Inservice Inspection Code Case Acceptability - ASME Section XI Division 1."

It is important to note that the ISI Plan is a working document and that changes can be expected to occur during the implementation phase of the program. Accordingly, WPSC may have the need to periodically update you with the most recent revision of the ISI Plan.

Sincerely,

C. A. Schrock
Manager - Nuclear Engineering
