Ladies/Gentlemen:

Docket 50-305
Operating License DPR-43
Kewaunee Nuclear Power Plant
Response to Generic Letter 92-01, Rev.1, Supplement 1 - CORRECTION

Reference: Letter from C. R. Steinhardt (WPSC) to Document Control Desk (NRC) dated August 21, 1995.

The reference provided our response to the subject generic letter supplement. "Response to Requirement (4)" in Attachment 1 of the response refers to Technical Specification Proposed Amendment 134 and the potential need for a revision to this proposed amendment. The response should have reflected that the Nuclear Regulatory Commission (NRC) has reviewed and issued this amendment. As further discussed in the response, pending NRC endorsement of ASME Code Case N-514, the completion of industry activities concerning reactor vessel integrity, and the application of Regulatory Position 2.1 of Regulatory Guide 1.99, WPSC may need to request a new Technical Specification amendment.

We apologize for any inconvenience this error may have caused.

If you have any questions or require additional information, please contact a member of my staff.

Sincerely,

Clark R. Steinhardt
Senior Vice President - Nuclear Power
