Parks, Jazel

Thanks Charlie. Let's plan on March 3 and we can set up the logistics in the next couple of weeks. We will come to your place. Looking forward to your feedback and insights on this.

Joe

Joe-

I am available to work on this and would prefer our mtg be scheduled for March 3.

charlie

I also would prefer March 2 or 3.

Randy,

I have discussed this with Jeff and we are available 3/1, 2 or 3. I would prefer March 2 or 3, but could work with any of the 3 days.

Joe

Subject: RES review of the RI EP scenarios doc

It looks like we will get Charlie Tinkler to review the scenarios doc, maybe next week. I prefer his review to that of "pure" PRA types due to the broader application we are planning. He is also intimately familiar with the analysis techniques we are proposing to use once the scenarios are selected.

I am out 2/12-26 on AL and business (IAEA!) so I will not be available until 2/28. It would be good for you to see Charlie's comments perhaps the week of 2/21?

Is it possible to schedule a meeting here for 3/1, 2 or 3? Do you have any other business here? We should combine travel expenses with other projects if possible, although the meeting with Charlie is important. We could use telecom, although face to face is better.

Now all this is predicated on Charlie being able to review the doc. He is not the master of his schedule and could be pulled off... So before you make reservations, please touch base with him to ensure he can do the review and schedule the meeting effectively.

(P.S. I am back at IAEA 3/5-12 and AL to 3/16).

Thanks

Randolph Sullivan, CHP

Subject: Reviewers

Joe and Randy

I have been thinking about who would be good reviewers for the accident scenario selection report and it seems logical that the people involved in the sequence selection process for SOARCA would be good candidates. As I recall that would be people in Gary Demoss' branch (e.g., Chris Hunter and Marty Stutzke). I understand that Gary's branch is supporting Randy in other projects so it seems that this would lead to synergism. I suggest that Randy and Gary should talk.

I talked to Don Helton (he is in Kevin Coyne's branch) and he said he could probably review it also.
