**PETITION UNDER 10 C.F.R. §2.206 SEEKING ENFORCEMENT  
ACTION AGAINST OMAHA PUBLIC POWER DISTRICT AND  
FT. CALHOUN NUCLEAR POWER PLANT**

NOW COMES, Saprodani Associates, by and through and with, Thomas Saporito, Senior Consulting Associate (hereinafter "Petitioner") and submits a "*Petition Under 10 C.F.R. §2.206 Seeking Enforcement Action Against Omaha Public Power District and Ft. Calhoun Nuclear Power Plant*" (Petition). For the reasons stated below, the U.S. Nuclear Regulatory Commission (NRC) should grant the Petition as a matter of law:

**NRC HAS JURISDICTION AND AUTHORITY TO GRANT PETITION**

The NRC is the government agency charged by the United States Congress to protect public health and safety and the environment related to operation of commercial nuclear reactors in the United States of America (USA). Congress charged the NRC with this grave responsibility in creation of the agency through passing the Energy Reorganization Act of 1974 (ERA). In the instant action, the above-captioned entities are collectively and singularly a "licensee" of the NRC and subject to NRC regulations and authority under 10 C.F.R. §50 and under other NRC regulations and authority in the operation of one or more nuclear reactors. Thus, through Congressional action in creation of the agency; and the fact that the named-actionable parties identified above by Petitioner are collectively and singularly a licensee of the NRC, the agency has jurisdiction and authority to grant the Petition.

## STANDARD OF REVIEW

### A. Criteria for Reviewing Petitions Under 10 C.F.R. §2.206

The staff will review a petition under the requirements of 10 C.F.R. §2.206 if the request meets all of the following criteria:

- The petition contains a request for enforcement-related action such as issuing an order modifying, suspending, or revoking a license, issuing a notice of violation, with or without a proposed civil penalty, etc.
- The facts that constitute the basis for taking the particular action are specified. The petitioner must provide some element of support beyond the bare assertion. The supporting facts must be credible and sufficient to warrant further inquiry.
- There is no NRC proceeding available in which the petitioner is or could be a party and through which petitioner's concerns could be addressed. If there is a proceeding available, for example, if a petitioner raises an issue that he or she has raised or could raise in an ongoing licensing proceeding, the staff will inform the petitioner of the ongoing proceeding and will not treat the request under 10 C.F.R. §2.206.

### B. Criteria for Rejecting Petitions Under 10 C.F.R. §2.206

- The incoming correspondence does not ask for an enforcement-related action or fails to provide sufficient facts to support the petition but simply alleges wrongdoing, violations of NRC regulations, or existence of safety concerns. The request cannot be simply a general statement of opposition to nuclear power or a general assertion without supporting facts (e.g., the quality assurance at the facility is inadequate). These assertions will be treated as routine correspondence or as allegations that will be referred for appropriate action in accordance with MD 8.8, "Management of Allegations".
- The petitioner raises issues that have already been the subject of NRC staff review and evaluation either on that facility, other similar facilities, or on a generic basis, for which a resolution has been achieved, the issues have been resolved, and the resolution is applicable to the facility in question. This would include requests to reconsider or reopen a previous enforcement action (including a decision not to initiate an enforcement action) or a director's decision. These requests will not be treated as a 2.206 petition unless they present significant new information.
- The request is to deny a license application or amendment. This type of request should initially be addressed in the context of the relevant licensing action, not under 10 C.F.R. 2.206.
- The request addresses deficiencies within existing NRC rules. This type of request should

be addressed as a petition for rulemaking.

See, *Volume 8, Licensee Oversight Programs, Review Process for 10 C.F.R. Petitions, Handbook 8.11 Part III.*

**REQUEST FOR ENFORCEMENT-RELATED ACTION TO MODIFY,  
SUSPEND, OR REVOKE A LICENSE AND ISSUE A NOTICE OF  
VIOLATION WITH A PROPOSED CIVIL PENALTY**

**A. Request for Enforcement-Related Action**

Petitioner respectfully requests that the NRC take escalated enforcement action against the above-captioned licensee(s) and suspend, or revoke the NRC license(s) granted to the licensee for operation of the Ft. Calhoun Nuclear Power Plant in the United States; and that the NRC issue a notice of violation with a proposed civil penalty against the collectively named and each singularly named licensee in this matter - in the total amount of \$500,000.00. In addition, Petitioner requests that the NRC issue a confirmatory order to the licensee prohibiting the licensee from restarting any nuclear reactor at the Ft. Calhoun Nuclear Power Plant until such time as (1) the flood-waters subside to an appreciable lower level or sea-level; and (2) the licensee upgrades its flood-protection plan; and (3) the licensee repairs and enhances its current flood-protection berms; and (4) the licensee upgrades its station blackout procedures to meet a challenging extended loss of off-site power due to flood-waters and other natural disasters or terrorist attacks.

**B. Facts That Constitute the Basis for Taking the Requested Enforcement-Related Action Requested by Petitioner**

On June 26, 2011, a 2,000-foot berm at the Ft. Calhoun Nuclear Plant collapsed from the forces of flood waters surrounding the nuclear plant. The berm was constructed 16-feet wide at the base and 8-feet tall to provide flood protection for the nuclear plant's power-block. The licensee transferred the nuclear plant's off-site power to on-site diesel generators because of water leaking around the concrete berm surrounding the main transformers. In addition, flood-waters also surrounded auxiliary and containment buildings - designed to handle water up to 1,014-feet above sea level. NRC officials issued a statement to the media that - the licensee has an earthen berm to protect the electrical switch-yard and a concrete barrier surrounding electrical transformers.

Petitioner contends here that (1) the licensee's installed flood-protection measures and systems and barriers at the Ft. Calhoun Nuclear Power Plant are not sufficient to adequately protect the nuclear reactor from a full-meltdown scenario like that currently unfolding in Japan; and (2) the licensee's station blackout procedures are not sufficient to meet a challenging extended loss of off-site power due to flood-waters and other natural disasters or terrorist attacks.

**C. There Is No NRC Proceeding Available in Which the Petitioner is or Could be a Party and Through Which Petitioner's Concerns Could be Addressed**

Petitioner avers here that there is no NRC proceeding available in which the Petitioner is or could be a party and through which Petitioner's concerns could be addressed.

**CONCLUSION**

FOR ALL THE ABOVE STATED REASONS, and because Petitioner has amply satisfied all the requirements under 10 C.F.R. §2.206 for consideration of the Petition by the NRC Petition Review Board (PRB), the NRC should grant Petitioner's requests made in the instant Petition as a matter of law.

Respectfully submitted,

---
