ORGANIZATION NAC International (NAC)				
SUBJECT Scope of drop testing for the Model No. MAGNATRAN transport cask (Docket No. 71-9356)				
SUMMARY [REDACTED]				
NAC: Tom Danner, Mike Yaksh, Wren Fowler, Tony Patko NRC: David Pstrak, David Tang, Jennie Rankin				
A telephone conversation was initiated by NAC to discuss the scope of drop testing for the Model No. MAGNATRAN transport cask. Due to the unique impact limiter design, NAC proposes performing 2 drop tests (end drop and 45 degree drop) to benchmark the model. The side and shallow angle drops are similar to previously approved designs and additional test data is not needed. The staff noted that due to the unique design, wood properties modeling of the previously approved designs may need to be revisited.				
NAC indicated that they will be submitting a new application with a test plan near the end of July, 2011. The actual drop test is targeted for the end of September, 2011.
