Question 061: Reviewed question and asked candidates why the selected distractors A and D and they could not remember verifying core cooling prior to terminating ECCS flow so they selected an answer that addressed subcooling and/or pressurizer level as parameters to allow ECCS flow termination. No further action required.

Question 067: All candidates that missed question selected distractor A as they believed that the limit only applied to MODES 1 and 2. On review they understood why the applicability is MODES 1 through 4.. No further action required.
