Hi
Part of the reason for the call was to find out the timeline this was needed. June was proposed based on some folks we thought were on SOARCA. When carlos is back monday I will talk to him further. This is a research code and Jim and Brian have discussed before that research should be keep in RES. I know you are working to move a project which this may support and am not sure if it is research too but we should talk more to make sure we can meet your need. I am with my sister at a med center today so monday is the soonest I can get a better idea. Do you have any idea what your schedule is so we can evaluate with staff and sandia. Thanks

Hey

I was just thinking.

If RES is too busy to get to the changes I suggested until what June? Perhaps NSIR could pursue the Winmaccs changes with SNL directly. These do not affect the core of MACCS2 and are essentially a user interface. My impression is that it is a separate piece of software, although Carlos will understand this better then I...

Just a thought you might consider, we would want to coordinate in any case.

Randolph Sullivan, CHP
