Thomas Popik - Foundation for Resilient Societies

Comment On: NRC-2011-0069-0002
Petition for Rulemaking Submitted by Thomas Popik

Document: NRC-2011-0069-DRAFT-0019
Comment on FR Doc # 2011-11112

Submitter Information

Name: Patrick Cason

General Comment

I strongly support petition PRM-50-96. How these plants were ever allowed to be built if they have to be connected to the power grid at all times is something I just can't wrap my mind around. I don't know if it is technically feasible to use the recommendations in this petition. By that I mean, I don't know if modifying the decrepit plants we have now will make them even more dangerous than they already are. If you can't use the recommendations in this petition, I demand that you use whatever technology is available to make these plants survive a power outage lasting years with no resupply of petroleum fuel, if you admit that no such technology exists, then you concede that these plants cannot be made "safe", in which case they should be closed IMMEDIATELY!

Rulemaking Comments

Van,

Attached for docketing is a comment from Patrick Cason on PRM-50-96 (76 FR 26223) that I received via the regulations.gov website on 6/26/11.

Thanks,
Carol
