Dear Mr. Istre:

It has come to our attention that Amendment Nos. 25, 26, and corrected copy to 26 to your NRC License No. 12-16559-02 contained errors. On amendment No. 25, Item No. 9.B. did not contain exposure device AEA 741B as requested, your 401 South 23rd Street, Billings, Montana authorized storage, and dispatching when it should have only authorized storage and use as you requested and the stamp date should have read November 19, 2010 instead of November 23, 2010. The issue date of the termination of Anvil's NRC license was dated November 19, 2010, and your NRC license was signed concurrently with the termination of Anvil's license. Therefore, the stamp date for amendment No. 25 now reads November 19, 2010 to assure coverage of license activities during these 4 days, November 20 through 23, 2010.

Except for the stamp date of license issuance for amendment No. 25, amendment No. 26 and correct copy of 26 now contains the same changes.

We apologize for any inconvenience this may have caused you.

NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system. Pursuant to NRC's RIS 2005-31 and in accordance with 10 CFR 2.390, the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability.
