JUN 29 2011

Blaine Litteral
Radiation Safety Officer
Engineering & Environmental Solutions, LLC
200 N. Franklin Street, Suite 202
Zeeland, MI 49464

Dear Mr. Litteral:

Due to a change in the NRC's licensing policies, total possession limits for regulated nuclear materials need to be listed on NRC licenses, if applicable. As discussed between you and Frank Tran, by telephone on May 5, 2011, and based on the information you provided, we have listed the total possession limit for Items 6.A to 6.D on your license.

Enclosed is a corrected copy to your NRC license as a result of this change in the licensing policy. If you have any question regarding these changes, please contact the U.S. Nuclear Regulatory Commission, Region III office immediately at (630) 829-9623.

Note, we have removed the license condition that required you to restrict the possession of licensed materials to quantities below the minimum limit for establishing decommissioning financial assurance because based upon the new possession limits, this condition is no longer applicable. Also note, we have updated Item D. in the leak test license condition (Condition 13). Finally, License Condition 18, which addresses security criteria for portable nuclear gauges, has been modified in its entirety to incorporate additional security measures. These security measures are based on revisions to 10 CFR Part 30, by the addition of paragraph 30.34(i), "Security requirements for portable gauges," as published in the Federal Register on January 12, 2005, with an effective date of July 11, 2005. The final rule requires a portable gauge licensee to use a minimum to two independent physical controls that form tangible barriers to secure portable gauges from unauthorized removal whenever the portable gauges are not under the control and constant surveillance of the licensee.

NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system. Pursuant to NRC's RIS 2005-31 and in accordance with 10 CFR 2.390, the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability. The RIS may be located on the NRC Web site at: <http://www.nrc.gov/reading-rm/doc-collections/gen-comm/reg-issues/2005/ri200531.pdf> and the link for frequently asked questions regarding protection of security related sensitive information may be located at: <http://www.nrc.gov/reading-rm/sensitive-info/faq.html>.

The enclosed document contains sensitive security-related information.
When separated from this cover letter this letter is uncontrolled.

B. Litteral

A copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS).

The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

Sincerely,

William P. Reichhold
Materials Licensing Branch
