Due to the growing demand, we would like to add a semi-permanent facility as a dispatch location that would be used as a location of storage or use; and be dispatched gauge users to job sites for more than one customer; the address is M street and 11th street SE, Washington DC 20003.

The site in question is properly secured construction where ECS Midatlantic, LLC will be maintaining a construction office for approximately two years. Personnel in the satellite office and the gauges being stored there will be used for that project and other adjacent projects.

If you have any questions regarding the contents of this letter, or if there is need for further information, please contact us.

Sincerely,

Karl Higgins, III, PE
Vice President
