RE: U.S. Nuclear Regulatory Commission Materials License No. 24-32462-01MD

Colleen Carol Casey:

Please allow this letter to serve as notice that Medi-Physics, Inc., dba GE Healthcare is requesting the removal of Condition No. 20 from NRC Radioactive Materials License No. 24-32462-01MD.

The remodeling project of the GE Healthcare nuclear pharmacy located at 1623 Lotsie Blvd., Overland, MO 63132 is scheduled to be completed on August 1, 2011 and Condition No. 20 will no longer apply beyond that date. This license amendment request will revert that portion of the existing laboratory area deemed "temporarily unrestricted" for remodeling purposes back to "restricted use" status.

Should you have any additional questions, please feel free to contact me at (609) 514-6647 or (609) 209-6832.

Sincerely,

Richard A. Hughes
Corporate Radiation Safety Officer
