Sioux Falls, South Dakota 57107

SUBJECT: LICENSE AMENDMENT

Please find enclosed Amendment No. 29 to NRC License Number 40-32477-01 **removing two locations of use, adding a location of use, and adding authorized users as requested in letters dated May 9, June 6, and June 17, 2011. Please note, that the authorized users added are not authorized to use generator or reagent kits. In order for this exception to be removed the authorized users would have to be trained in accordance with 10 CFR 35.290(c)(1)(ii)(G). In addition, in accordance with 10 CFR 20.1402 the site located at 1322 East Cherry Street, Vermillion, South Dakota is released for unrestricted use.** An environmental assessment for these actions are not required, since these actions are categorically excluded under 10 CFR 51.22(c)(14)(iv) and 10 CFR 51.22(c)(20)(i). You should review the enclosed document carefully and be sure that you understand all conditions. You can contact me at 817-276-6596 if you have any questions about this license.

As a reminder, your license expires on December 31, 2011. In accordance with 10 CFR 30.36 you must submit a renewal request at least 30 days before the expiration date.

In addition, please note that NRC Form 313 requires the applicant, by signature, to verify that the applicant understands that all statements contained in the application are true and correct to the best of the applicant's knowledge. The signatory for the application should be the licensee or certifying official rather than a consultant. Since the NRC also accepts a letter requesting amendment of an NRC license, the signatory for such a request should also be the licensee or certifying official rather than a consultant.

NRC will periodically inspect your radiation safety program. Failure to conduct your program according to NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC may result in enforcement action against you. This could include issuance of a notice of violation; imposition of a civil penalty; or an order suspending, modifying, or revoking your license as specified in the NRC Enforcement Policy. The NRC Enforcement Policy is available on the following internet address:
<http://www.nrc.gov/reading-rm/doc-collections/enforcement/>.

NRC no longer publishes the NRC Rules and Regulations loose leaf supplements. However, an electronic version of the NRC's regulations is available on the NRC Web site at www.nrc.gov. Additional information regarding medical uses of radioactive materials may be obtained on the NRC Web site at: <http://www.nrc.gov/materials/miau/med-use-toolkit.html>. This site also provides the updated Training and Experience NRC Form 313A series of forms and guidance,

as well as information on the revised regulations for naturally-occurring and accelerator-produced radioactive materials (NARM).

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Thank you for your cooperation.

Sincerely,

/RA/

Lizette Roldán-Otero, Ph.D., Health Physicist
Nuclear Materials Safety Branch B
