**Subject:** NRC-2010-0267-No to spent nuclear reprocessing facilities

The NRC is proceeding with nuclear reprocessing despite the obvious FACT that nuclear energy is a non-starter. It is not safe (think Fukushima). The 4 W's regarding nuclear are as huge stumbling blocks as they ever were - Waste, Water, Weapons and Wall Street would never touch such a risky investment. We, the People of the United States, will not be forced to deal with radioactive waste or pay for it. The NRC behavior is unacceptable. Sincerely,

Deb Arnason 12 Dill St, Alva, FL 33920 386-288-4454
