Re: Clarifications to License Renewal

Dear NRC,

Concerning Kanawha Stone Company, Inc.'s application for license renewal, we do not have any additional changes from the license number 47-25023-01, expiration date 11-30-93, reference # 030-30838, that we would like to add.

All conditions stated in the previous license are being complied with in accordance with the Nuclear Regulatory Commission. Frederick S. Hardesty is still the Radiation Safety Officer and all work using licensed material is under his presence and supervision.

Find enclosed a copy of our most recent license in duplicate. If there are any additional requests, please feel free to contact me at any time. Thank you for your cooperation.

Sincerely,

Roger Young
Safety Director
