- 18. The licensee shall not use licensed material in or on human beings except as provided otherwise by specific condition of this license.
- 19. The licensee shall not acquire licensed material in a sealed source or device that contains a sealed source unless the source or device has been registered with the U.S. Nuclear Regulatory Commission under 10 CFR 32.210 or with an Agreement State.
- 20. The licensee shall maintain records of information related to decommissioning at 3400 Broadway, Gary, Indiana as specified in 10 CFR 30.35(g) until this license is terminated by the Commission.
- 21. The licensee shall conduct a physical inventory every six (6) months to account for all sealed, plated and foil sources received and possessed under the license. The records of the inventories shall be maintained for two (2) years from the date of the inventory for inspection by the Commission, and shall include the quantities and kinds of byproduct material, manufacturer's name and model numbers, location of each sealed, plated and foil source and the date of the inventory.
- 22. Except as specifically provided otherwise in this license, the licensee shall conduct its program in accordance with the statements, representations, and procedures contained in the documents, including any enclosures, listed below. The U.S. Nuclear Regulatory Commission's regulations shall govern unless the statements, representations, and procedures in the licensee's application and correspondence are more restrictive than the regulations.
