St. Peter's Community Hospital
ATTN: Rodney Knable, ARRT(N)
Radiation Safety Officer
2475 Broadway
Helena, Montana 59601

SUBJECT: LICENSE AMENDMENT-CORRECTED COPY

Please find enclosed a corrected copy of Amendment No. 37 to NRC License No. 25-12453-02 **adding Drs. Seibly and Tarver to your material license as authorized users. This amendment also removed Drs. Murphy and Pfeffer as authorized users, as requested. As discussed during our telephone conversation, the authorization for byproduct material permitted by 10 CFR 35.400 was removed from your license because Dr. Murphy was the only authorized user for this material. This action was taken without prejudice. You may request to add the authorization for byproduct material permitted by 10 CFR 35.400 to our license in the future, provided that you also have an individual authorized to use this material.** An environmental assessment for this action is not required, since this action is categorically excluded under 10 CFR 51.22(c)(14)(iv). You should review the enclosed document carefully and be sure that you understand all conditions. You can contact me at 817-276-6590 if you have any questions about this license.

In addition, please note that NRC Form 313 requires the applicant, by signature, to verify that the applicant understands that all statements contained in the application are true and correct to the best of the applicant's knowledge. The signatory for the application should be the licensee or certifying official rather than a consultant. Since the NRC also accepts a letter requesting amendment of an NRC license, the signatory for such a request should also be the licensee or certifying official rather than a consultant.

NRC will periodically inspect your radiation safety program. Failure to conduct your program according to NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC may result in enforcement action against you. This could include issuance of a notice of violation; imposition of a civil penalty; or an order suspending, modifying, or revoking your license as specified in the NRC Enforcement Policy. The NRC Enforcement Policy is available on the following internet address:
<http://www.nrc.gov/reading-rm/doc-collections/enforcement/>.

NRC no longer publishes the NRC Rules and Regulations loose leaf supplements. However, an electronic version of the NRC's regulations is available on the NRC Web site at www.nrc.gov. Additional information regarding medical uses of radioactive materials may be obtained on the NRC Web site at: <http://www.nrc.gov/materials/miau/med-use-toolkit.html>. This site also provides the updated Training and Experience NRC Form 313A series of forms and guidance, as well as information on the revised regulations for naturally-occurring and accelerator-produced radioactive materials (NARM).

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Thank you for your cooperation.

Sincerely,

/RA/

Michelle Simmons, Health Physicist
Nuclear Materials Safety Branch B

Docket: 030-10917
License: 25-12453-02
Control: 575309 and 574850

Enclosure: As stated
