Subject: STP - RAI 03.09.02-21 ACTSIC2 V&V

John,

RAI 03.09.02-21 requested NINA to explain the validation process of ACSTIC2 and verify if this code should be included in the STP Units 3 and 4 FSAR. In NINA's revised response to RAI 03.09.02-21 in letter U7-C-NINA-NRC-110064 dated April 13, 2011, NINA provided information on the verification of the code and stated that the verification analysis is available for audit. In addition, the revised response also provided proposed changes to Appendix 3D and Sections 4.1, 4.1.4.1, and 4.1.4.1.10 to include ACSTIC2 to the FSAR. EMB2 staff found the proposed addition to the FSAR acceptable and we will confirm this information will be in the next FSAR revision. Therefore, we'll track this action as "Confirmatory".

On June 22, 2011, EMB2 staff conducted an audit of ACSTIC2 V&V. The audit identified problems with the V&V package that we shared with NINA's staff during the exit and in a public meeting (via telephone conference on July 20, 2011). We will continue to pursue the closure of this issue in a new RAI to be issued under Chapter 3.9.1. Therefore, RAI 03.09.02-21 will be statused as "Closed and Unresolved".

Please let me know if you have any questions.

Regards

Tom Tai
