Colley:

I agree with the status of Chapter 5 ACRS open items.

Stacy and Tekia,

STP comments are provided below, related to Chapters 5, 6 and 10:

(Ch 5) : We agree that RCIC items #70, 71 and 89 were closed based on the 6/21 discussion; however, STP left with with the understanding that a follow up ACRS action item associated with RCIC would need to be addressed: "How long to reach 77C in the suppression pool during SBO?"

(Ch 6/LTC) : Item #47a states "Provide downstream effects test procedure to ACRS" -- we believe that this issue has been resolved for COLA review based on STP 3&4 commitment COM 6C-2 to provide the detailed test procedure to the NRC at least six months prior to performing the test (letter U7-C-NINA-NRC-110078, dated 6/8/11).

(Ch 10) : Item #59 states "Closed-Post COL turbine missile analysis to be provided to ACRS" -- we agree that this issue should be closed for COLA review; however, this analysis will not be submitted to NRC until 3 years after COL.

Regards,

Coley Chappell
NINA Licensing STP 3 & 4

Subject: FYI and Review: ACRS Action Item Table Updated after 6/21/11 ABWR SC Briefing

Please see revisions (made in red) and let me know if you have any questions or comments. **Please coordinate with the applicant as necessary.** I also added ACRS Consultant Dr. Hinze' questions on the list, to be addressed at the next Chapter 2 briefing.

I will be on travel next week, but will consider your comments as I plan to send the finalized list to the members soon.

Thanks much.

Maitri
